CERTIFICATE OF INTERNSHIP

Juntima Nawilajaroen

Spotify is an award-winning digital music service which brings you the right music for every moment – on your computer, your mobile, your tablet, your home entertainment system and more. Spotify was founded in 2006 by Daniel Ek and Martin Lorentzon and is now available in 57 markets around the world and has about 1400 employees.

Juntima Nawilajaroen, has been enrolled in Spotify's summer internship program at Spotify AB during the period of 2014-06-23 – 2014-08-30. Juntima worked in the Your Music team reporting to Mattias Björnheden.

Juntima was responsible for building context aware functionality on iOS to be used in employee testing. Juntima was involved in building functionality to log location and activity and send that data to a backend service. She then built views to present playable lists of tracks based on that context, e.g. "at home", "at work". The outcome of the project was initially shipped to about a thousand employees to serve as the foundation for further experimentation around Spotify features based on context.

Juntima has done a great job during the time with Spotify and we wish her all the best for the future.

I would warmly recommend her and would be happy to work together again.

Yours faithfully,

A handwritten signature in blue ink that reads "Mattias Björnheden".
